Name of the Activity	**Moon Gazing**
Date of the Activity	**17 October, 2024**
Venue	**RNJ Amphitheater**
Organized By	**FLAME Astronomy Club**
No. of Participants	**50**

Brief Report

The Moon Gazing event began with a lively blend of music and excitement as participants eagerly awaited the arrival of the night's main attraction—the Super Moon. While the telescope was being prepared to capture the spectacle amidst a partly cloudy sky, the crowd was entertained with uplifting music and impromptu dancing, adding to the joyful atmosphere.

Once the telescope was ready, attendees were treated to a stunning view of the Super Moon as it appeared through the thinning clouds. The sight of the Moon, with its detailed craters and intricate surface features, captivated the audience. The clarity and beauty of this celestial body left many in awe, especially for those experiencing a close-up view of the Moon through a telescope for the first time.

The event was a huge success, with attendees enchanted by both the atmosphere and the breathtaking sight of the Moon. The night ended on a high note, with everyone leaving content and inspired by the wonders of the universe.
