Git 101 Session Report

Academic Year	2024-25
Name of the Activity	Git 101 Session
Date of the Activity	05.03.2025
Venue	RNJ 101
Organized By	DotSlash
No. of Participants	12

Brief Report

The FLAME DotSlash Club successfully hosted its Git 101 Workshop on 5th March 2025, 4:30 PM in RNJ101. The workshop was taken by Aarav Navani of the content team, who gave an interactive introduction to Version Control Systems (VCS), specifically Git, the industry's most used VCS.

With around 10-12 students present, the session boasted a mix of students along with the club members, and this showed an increased interest in acquiring the essential coding tools. Aarav performed a great job of breaking down the fundamentals of Git and highlighting key points. He ensured that even beginners at coding would be able to comprehend the concepts and use Git for their projects confidently.

The session was extremely interactive, with participants actively engaging and keeping pace with the hands-on demonstrations. With practical examples, participants were able to learn how to use Git, manage changes effectively, and work together easily on coding projects. The workshop was able to demystify Git for new users, making version control less daunting and more user-friendly.

The workshop concluded on a positive note with the participants liking the clear explanations and useful observations presented to them. Good feedback and response having been given, this workshop is another hit for DotSlash in establishing the robust and vibrant coding community at FLAME University.
