

Yearly Report
The Story Project
2022 - 2023

The Story Project returned to its original form of working on field at the Balbhavan this year. It was started off by dividing the children into batches of two as per their age group. All the younger children were in one group and the older in one. This was done in order to make learning more effective as the learning capacity of each group was different. In order to do so the strength size of each team (content, data and executive) was increased from a usual of 10-12 members to 15-17 members. We also started a social media team with 3 members who would keep the activities of the events that TSP organised updated on our instagram handle and help grow the knowledge of TSP at FLAME. We also organised activity and colouring books for the children to be busy with while the other age group of children were being taught.

The Content Head (Aathishree) worked on the syllabus along with the guidance of the Secretary (Isha) and the Joint-Secretary (Nandini). She would ensure that her members submit the lesson plan on time which she would then forward to the Exec Head (Dhruvi). Dhruvi would make sure she makes a timetable for the Exec members to go on fields in coordination with the Data Head (Mitali) and her team.

Events

TSP held a number of events this year as we realised that a well rounded education was important for the children. We held different events in collaboration with other clubs such as dance sessions with the FLAME Dance Club and Hand Painting Workshop with the Art Club. We also collaborated with the EVS club to take the children on a nature walk around the campus.

All in all, TSP was able to go back to its original form of functioning this year and grow further with the help of the numerous events held.
